Until it's over and until there's a cure.....

AIDS Vital Statistics

Worldwide:

- Over 22 million people have died from AIDS.
- Over 42 million people are living with HIV/AIDS, and 74 percent of these infected people live in sub-Saharan Africa.
- Over 19 million women are living with HIV/AIDS.
- By the year 2010, five countries (Ethiopia, Nigeria, China, India, and Russia) with 40 percent of the world's population will add 50 to 75 million infected people to the worldwide pool of HIV disease.
- There are 14,000 new infections every day (95 percent in developing countries). HIV/AIDS is a "disease of young people" with half of the 5 million new infections each year occurring among people ages 15 to 24.
- The UN estimates that, currently, there are 14 million AIDS orphans and that by 2010 there will be 25 million.

United States:

- An estimated one million people are currently living with HIV in the United States, with approximately 40,000 new infections occurring each year.
- 70 percent of these new infections occur in men and 30 percent occur in women.
- By race, 54 percent of the new infections in the United States occur among African Americans, and 64 percent of the new infections in women occur in African American women.
- 75 percent of the new infections in women are heterosexually transmitted.
- Half of all new infections in the United States occur in people 25 years of age or younger.

HIV/AIDS IN CONNECTICUT

While the federal government's investment in treatment and research is helping people with HIV/AIDS live longer and more productive lives, HIV continues to spread at a staggering national rate of over 40,000 new infections per year. The following data represent the total reported AIDS cases in Connecticut through year-end 2004:

County	Total Cases
Hartford	4,423
New Haven	4,378
Fairfield	3,473
New London	717
Middlesex	247
Windham	230
Litchfield	217
Tolland	130

RNP FACTS

Regional Network of Programs, Inc. designates a particular type of service that deals with HIV/AIDS related issues among its methadone clients. Better known as the AIDS Unit under the supervision of Cathy Fowles, LPN, it provides counseling and testing services to those who are admitted in the methadone maintenance programs. With the primary goal of educating clients about HIV prevention, over 1400 were educated this past year. The reported number of clients served in 2005 and 2006 was 1635 and 1795, respectively. Additionally,

- 100% of clients admitted received HIV information;
- 100% of the clients at high risk developed a risk reduction plan;
- 100% of the seropositive clients developed medical and psychosocial treatment plans with baseline and follow-up measurements; and
- 100% of seropositive clients left treatment with a support system assignment or referral in place.

The charts below illustrate the demographic information of RNP's seropositive clients as of December 2006.

Stats in Brief

covers statistics on drug and alcohol abuse, shelters for the homeless, group homes, AIDS, and client's services. It is published every month by DMA to promote communication among RNP staff.
